

YOGESH KUMAR YADAV

AI/ML Engineer Intern — Generative AI — Machine Learning

6268138217 — yogesh626813@gmail.com — Bhilai, Chhattisgarh

GitHub — LinkedIn

Professional Summary

B.Tech (Hons.) CSE – Data Science student with hands-on experience in **Machine Learning, Generative AI, LLMs, RAG, NLP, and Computer Vision**. Built and deployed AI applications using **Python, Scikit-learn, LangChain, YOLO, FastAPI, Docker, and Streamlit**, with project internship experience at **IIT Bhilai** and **NIT Raipur × UNICEF**.

Education

Chhattisgarh Swami Vivekanand Technical University (CSVTU)

2024 – 2028

B.Tech (Hons.) – Computer Science & Engineering, Data Science

CGPA: 8.46

Class XII – Higher Secondary Education

2024

PCM

90.4%

Experience

Project Intern – Indian Institute of Technology Bhilai

May 2026 – Jun 2026

Data-Driven Analytics & Rural Sustainability

- Collected and analyzed **field, GPS, agricultural, livestock, and location-based data** for rural sustainability studies.
- Created and annotated a custom **plastic-waste dataset** and trained a **YOLO-based object detection model** for waste identification.
- Applied **Python, Machine Learning, GIS/Mapping, data visualization, dataset annotation, and Microsoft Excel** in field-based projects.

Project Intern – NIT Raipur × UNICEF

Jul 2026

EchoByte – Plastic Recovery & Smart Waste Management

- Contributed to an AI-driven ecosystem for **plastic recovery, smart surveillance, and community-led waste management**.
- Worked with **YOLO-based computer vision, plastic waste detection, waste segregation, OCR, and vehicle number-plate detection**.
- Supported **AI/ML integration, data processing, testing, and software workflows** for sustainability applications.

Projects

OmniAgent Pro – Multi-Modal AI Context Platform

[Live Demo](#)

- Built a **multi-modal AI assistant** for conversational question answering over **PDF and image documents**.
- Implemented **LLM, RAG, document processing, embeddings, retrieval, and grounded response generation** workflows. **Tech:** Python, LLMs, RAG, LangChain, Hugging Face, Streamlit.

OmniData – Natural Language Data Analysis Agent

[Live Demo](#)

- Built an AI-powered application allowing users to upload datasets and perform **data analysis using natural language**.
- Implemented **Python/Pandas code generation, schema-aware processing, validation, controlled execution, and automated charts/tables**. **Tech:** Python, Pandas, NumPy, Generative AI, LangChain, Mistral AI.

Student Mental Health Score Prediction

[Live Demo](#)

- Built an ML application predicting **student mental wellbeing scores** from screen time, sleep, study hours, stress, and digital habits.
- Performed **data preprocessing, feature engineering, model training, and evaluation**; deployed using **FastAPI** with an interactive web UI. **Tech:** Python, Pandas, NumPy, Scikit-learn, FastAPI, REST API.

Technical Skills

Languages: Python, C++, C, SQL, JavaScript

ML/Data: Scikit-learn, Pandas, NumPy, Matplotlib, Classification, Regression, Feature Engineering, Model Evaluation, EDA

GenAI/LLM: LLMs, Generative AI, RAG, LangChain, Embeddings, Vector Search, Prompt Engineering, AI Agents

Computer Vision: YOLO, OpenCV, EasyOCR, Object Detection, Image Processing

Development: FastAPI, Flask, REST APIs, Streamlit, Docker, Git, GitHub

Platforms/DB: Mistral AI, Gemini, Hugging Face, SentenceTransformers, ChromaDB, Supabase, MySQL, PostgreSQL

Achievements & Certifications

- 2nd Position** – Celestial Strokes, IIT Kharagpur NSSC 2025.
- Participated in **NASA Space Apps Challenge 2025** at NIT Raipur.
- Certifications:** Machine Learning for Data Science – IBM; Machine Learning Certification – Simplilearn.
